

HOW TO DOWNLOAD AND INSTALL YOUR MINECRAFT WORLD

Locate the File for the world you want... World Files will ALWAYS be grey and white and look like this:

DO NOT open the folder and download the separate elements within, just download the whole folder by right clicking and selecting “Download”

You MAY find that the download gets zipped by Google. If this happens, you will need to unzip this using your programme of choice. Right click on the zip file and select “Unzip”.

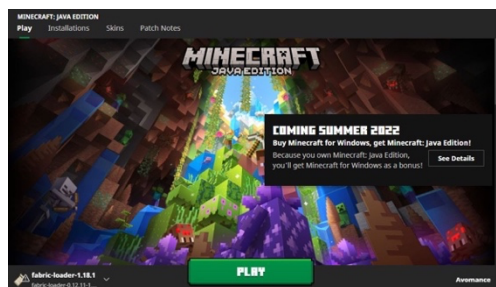

Once you have the unzipped file, place the WHOLE FILE into your Minecraft Saves folder by dragging and dropping the folder into it.

If you don't know where this folder is, you can find it in two ways...

OPTION 1 to find your saves folder: THROUGH THE MINECRAFT GAME

Open up Minecraft and hit play.

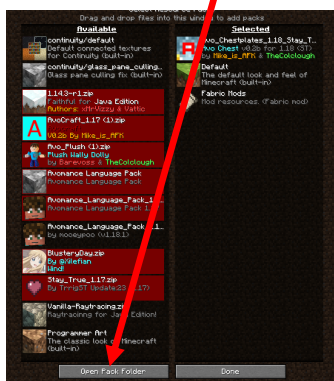

Once launched, click “Options”

then “Resource Packs...”

then “Open Pack Folder”

This will take you to your ResourcePacks folder on your system

AppData > Roaming > .minecraft > resourcepacks

Name	Date modified	Type	Size
Avomance Language Pack	27/02/2022 00:50	File folder	
1.14.3-r1	25/07/2019 10:59	Compressed (zipp...	6,471 KB
Avo_Chestplates_1.18_Stay_True	16/11/2021 23:21	Compressed (zipp...	24 KB
Avo_Plush (1)	27/08/2021 17:35	Compressed (zipp...	2,915 KB
AvoCraft_1.17 (1)	31/08/2021 20:49	Compressed (zipp...	18 KB
Avomance_Language_Pack_1.17	12/07/2021 09:16	Compressed (zipp...	135 KB
Avomance_Language_Pack_1.18.1	04/01/2022 15:46	Compressed (zipp...	135 KB
BlusteryDay	12/03/2021 18:12	Compressed (zipp...	12 KB
Stay_True_1.17	12/07/2021 09:17	Compressed (zipp...	1,853 KB
Vanilla-Raytracing	28/02/2022 09:27	Compressed (zipp...	4,034 KB

Go UP one level on the navigation bar at the top to “.minecraft” where you will find a number of folders, including the saves folder

AppData > Roaming > .minecraft

Then drag and drop your Downloaded Minecraft World into the saves folder

Skyscraper Farm 2.0 PL...

Open your game and the world will be waiting in your single player list of Minecraft Worlds. Enjoy!

OPTION 2 to find the saves folder: THROUGH YOUR DESKTOP

Minecraft hides its game folders to avoid any accidental deletions. You can find the folders by following these instructions:

ON WINDOWS:

1. In your search bar (Normally in the bottom left of your desktop screen) type %appdata% and hit enter.
2. Click on the offered %appdata% link, which will take you to the appdata folder which is hidden in your file system
3. Click roaming
4. Click .minecraft
5. Your saves folder will be there
6. Drag and drop your downloaded world into the saves folder
7. Open your game and the world will be there for you. Just click on it and enjoy!

ON MAC

1. In Finder, select “Go” (normally at the top of your screen)
2. While in that menu, press and hold the option key
3. A secret folder called “Library” will appear – click on it while holding the option key
4. Select “Application Support”
5. Scroll down and select “Minecraft”
6. You will find your saves folder there
7. Drag and drop your downloaded world into the saves folder
8. Open your game and the world will be there for you. Just click on it and enjoy!
